Digital Documents

Automate document flow

Automate, simplify and secure the flow and processing of documents

Lithe Digital Documents

Many business processes must gather, understand, share and process documents – yet, the level of automation in these document-intensive processes remains too low in most organizations. Lack of automation results in:

- Slow workflow
- Poor customer experience
- Inadequate support for hybrid workers
- Delayed decisions
- Compliance and security risks
- Wasted worker time

Lithe Digital Documents solves these problems by accelerating document-based workflows simply and securely for individuals and teams, wherever they are.

Lithe transforms inefficient document flow and processing into a friction-free automated process, integrated to your current teams, processes and systems. For documents originating as paper mail, email, mobile device submissions, branch office scans, or portal uploads – any documents from anywhere – Lithe Digital Documents simplifies and accelerates essential workflows.

Lithe Digital Documents automates document-intensive workflow.

- Claims
- Applications
- Onboardings
- Loans
- Mail processing
- Case management
- and more

About Lithe

Lithe transforms lives through intelligent automation. We enable our customers to reduce friction in document-centric workflows, increase productivity, strengthen compliance and security, and improve customer engagement.

Lithe Digital Documents is a cloud-based service that accelerates, simplifies, and secures document flow and processing.
